

Product Requirements Document (PRD):

Kenvenience Store

Product Name: Kenvenience Store (KENTECH Dormitory Seven-Eleven Smart Service) **Version:** 1.1.0 (Updated)

1. Product Overview

Kenvenience Store is a dedicated web service designed for KENTECH students living in the dormitory to enhance their convenience when using the on-campus Seven-Eleven. The service addresses pain points such as information asymmetry regarding stock and the financial burden of bulk promotional deals.

2. Target Users & Pain Points

- **Target Users:** KENTECH undergraduate/graduate dormitory residents.
- **Pain Points:**
 - **Information Asymmetry:** Students don't know if items are in stock before walking down.
 - **Financial Burden:** 1+1 or 2+1 deals are hard for single students to manage alone.
 - **Stock Limitations:** Specific items students want might not be stocked.

3. Project Goals

- Provide a centralized dashboard for store promotions.
- Establish a crowd-sourced request channel for ordering specific products.
- Foster a cooperative student community for "Split-the-Deal" purchases.

4. Core User Scenario

Scenario: Minsoo, a sophomore, wants a 2+1 ice cream deal but only wants one. He uses the "Split-the-Deal" hub to find two other students, meets them at the store, and they share the cost.

5. Feature List & Priorities

- **F-01: Stock & Promo Viewer** (Must-have): Real-time view of 1+1/2+1 deals.
- **F-02: Item Pre-Order Request** (Must-have): Form to request new stock.
- **F-03: Split-the-Deal Hub** (Should-have): Community board to find deal partners.
- **F-04: Live Status Filtering** (Nice-to-have): Search and category filters.

6. Page Structure

- **Home (Dashboard):** Quick view of top deals and active splits.
- **Promo Page:** Filterable list of all store promotions.
- **Order Request:** Form and "Like" system for item requests.
- **Split-Board:** Dedicated interactive board for co-purchasing.

7. Technical Requirements

- **Frontend:** HTML5, CSS3, Vanilla JavaScript.
- **State:** `localStorage` for data persistence.
- **Deployment:** Vercel.

8. Design Requirements & Wireframe

- **Theme:** Seven-Eleven Identity Colors (Green: #008135, Orange: #EE7203, Red: #E41E26).
- **Wireframe Sketch:**

```
+-----+
| [Logo] Kenvenience      [Promo] [Split] [Req] |
+-----+
|           KENTECH SMART CONVENIENCE           |
|   [ Search Items... ] [ Category Filter ] |
+-----+
| +-----+           +-----+ |
| |   Item Card   |       |   Split Card   | |
| | [1+1] Coke    |       | [2/3] Joined    | |
| +-----+           +-----+ |
+-----+
```

(Note: For the final PDF, please insert a screenshot of the actual implemented site here to satisfy the visual requirement.)

9. Milestones (Updated Timeline)

1. **Phase 1: PRD Writing & UI/UX Wireframing** (~2026-06-01)
2. **Phase 2: HTML Boilerplate & CSS Styling** (~2026-06-05)
3. **Phase 3: JavaScript Core Logic Implementation** (~2026-06-10)
4. **Phase 4: Vercel Deployment & Final Documentation** (~2026-06-14)
